#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

OFFICE ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Haber 4,103,773.

Haber teaches a hopper 22 and a tray 14 and further having a truncated level 18. Elements 31 on the hopper are configured to complement elements 30 on the base. An effective hinge arrangement results. Elements 17 and 21 are “dimples” with a “curvature”. The sidewalls of hopper 22 and tray 14 and truncated level are the “spacer” elements. The “lid” is shown at 24.

The particular configuration allows for easy stacking.

RESPONSE TO REMARKS

Applicant argues that Haber stores pool balls and therefore does not anticipate stacking golf balls. The examiner maintains the Haber reference anticipates the claims as recited and whether pool balls or golf balls are stacked is immaterial since it is the inventive concept that it is at issue and the particular type of ball is not positively claimed.

Applicant further argues that the Haber device would not stably self-support if turned upside down because of supporting pool balls rather than golf balls. The

examiner disagrees and maintains that the device would indeed self support if turned upside down in that the area in contact with the horizontal surface would indeed provide a stable base whether right side up or upside down.

Applicant argues Haber does not teach the dimples with a curvature. The examiner has pointed out in the rejection that the dimples with are curvature are elements 17 and 21.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sarah Purol whose telephone number is 571-272-6834. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Glessner, can be reached at 571-272-6843. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
